

Passionate About Precision Engineering Since 1969

- Specialists in Precision Engineering for Precision Products
- Specialists for Inspirational Engineering Solutions
- Specialists in Precision Engineering for Precision Products

Based in the town port of Newhaven (East Sussex), Mach4 is a engineering company with a proud history for devising inspirational solutions, clever design and highest quality precision engineered components and parts.

We pride ourself on producing quality CNC manufactured parts and instruments for a broad range of customers in a wide range of scientific, industrial and technical fields.

We have 5 machining centres for making milled and turned parts, a range of peripheral equipment, and a comprehensive assembly area.

We are very experienced in supplying high specification parts and assemblies that assist in the latest research and development projects worldwide.

Mach4 Engineering has an off-the-shelf product portfolio of over 9,000 components and parts in a wide range of specification, design and materials for most applications.
